Problem Solving Masterclass for Practitioners

Problems by their very nature are a problem! They **frustrate us, waste time and resources, distract us from other priorities** and ultimately **cost us money and opportunity.** Therefore, having the **knowledge and skills to effectively resolve problems,** or at least reduce the impact of problems, is a **most valuable commodity.**

This workshop is designed to get to the **root of problems.**

Delegates will gain the **knowledge and confidence** to develop effective **problem-solving skills** and organisations will receive a better return on their problem management investment.

Suitable for practitioners in any role where there is the opportunity to work in **cross functional teams to resolve problems.**

✓ **A one day workshop**
✓ **For up to 8 delegates**
✓ **Face to face or Online**

Supported by a **comprehensive workbook,**
this **interactive and practical masterclass** will explore the following:

| Understanding the barriers to effective problem solving | The 3 stages of problem solving | Problem solving Tools and Techniques (Part 1) | Problem Solving Tools and Techniques (Part 2) | Actions Planning |

This **one day** workshop costs **£250 per person.**

It can also be scheduled as **an in-house workshop** costing **£1250 for up to 8 people** from the same organisation.
